Who We Are

New Options Sports has been in business creating orthopedic braces and supports for the past 48 years.

Founded by John Scott, New Options Sports has been making orthopedic and sports medicine braces and supports since 1976. In 1978, New Options Sports established a custom design department in order to fill the demand for individually designed braces. We continue to offer this made-to-order process as a special service to our customers who need custom-designed and fitted braces and supports.

Since 1981, New Options Sports has supplied products to the US Olympic Committee, the American Tennis Professionals (ATP), and Athletes in Action. We are proud to supply many products to the Veterans Administration, Military, Children's, and Shriner's Hospitals.

Made in the USA

At New Options Sports, we take immense pride in the fact that our products are 100% made in the USA. But what does that really mean?

Unlike many other companies in our industry, we do not “pre-manufacture” any pieces or parts overseas. In fact, around 99% of our competitors opt to purchase their parts from other countries, and then merely “assemble” their products within the USA. Often, they do no manufacturing in the USA at all and simply buy cheap products and resell them to an unsuspecting public. While this approach may lower costs, it also means that they are indirectly supporting these other economies, diverting millions of dollars away from our domestic economy.

In stark contrast, we have maintained an unwavering commitment to pro-American manufacturing for over 40 years. Every single aspect of our production process takes place right here in the USA. From start to finish, we sew every last stitch of every part using highly skilled and experienced teams of seamstresses who take immense pride in their craft.

By producing our products entirely within the United States, we support our local economy, provide jobs to fellow Americans, and maintain quality control at every step. Our highly skilled seamstresses ensure that each brace and support meets the highest standards of craftsmanship and durability.

So when you choose New Options Sports products, you can be confident that you are not only receiving a top-quality orthopedic brace or support, but also supporting American workers and the economy. Our commitment to manufacturing everything in the USA is a testament to our dedication to quality, ethical practices, and our contribution to the prosperity of our nation.

Koolflex vs. Neoprene

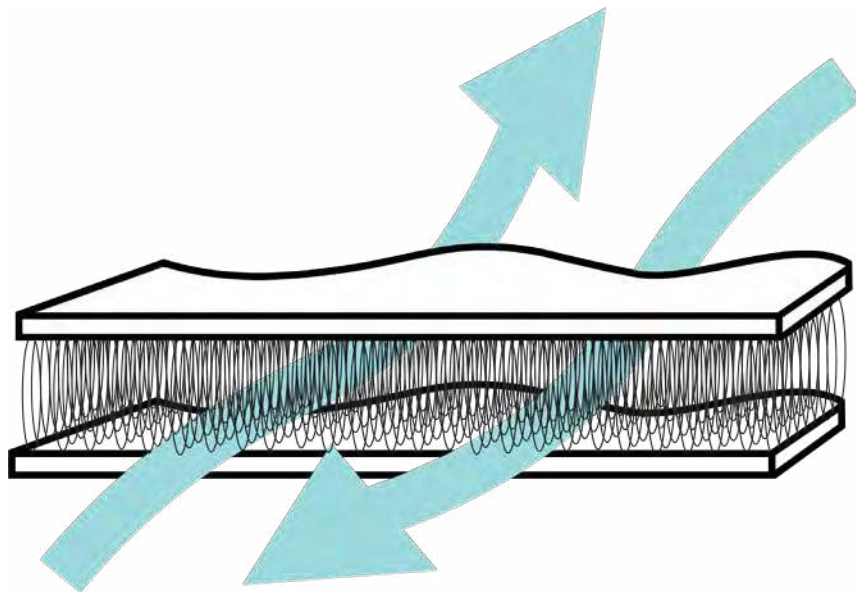

Koolflex is a comfortable and lightweight material made of a poly-nylon core with a poly-spandex blend outer cover. This unique knitting construction enables easy airflow and allows perspiration to be wicked away from the skin to the outside layer of fabric, reducing bacterial growth.

Unlike neoprene, Koolflex does not contain crude oil latex, making it a great option for people with heat or allergy issues.

The elastic bias tape border around the outer edges of Koolflex products prevents the material from fraying while maintaining its stretch and memory for a better fit.

Please note that Koolflex is only available in black.

It's important to note that Koolflex is not a replacement for neoprene, as neoprene provides greater compression and warmth due to its cell structure. However, Koolflex is an excellent alternative for those who need to wear supports for long periods of time.

Knee Braces

Our knee braces are designed to provide optimal support and relief for individuals with knee injuries or conditions. Whether you're recovering from a sports-related injury, managing arthritis, or seeking stability during physical activities, our range of orthopedic knee braces offers the perfect solution for your needs. From lightweight and flexible options for mild discomfort to advanced, high-performance braces for severe injuries, we have carefully curated a collection of braces that prioritize both comfort and functionality.

Padded Multi-Position Hinge Knee Brace (K2-U-MP)

FEATURES:

- Multi-position extension hinge that allows for convenient setting of extension stops
- Comfortable multi-position felt buttress for increased comfort and fit
- 3/16" nylon, 2-sided neoprene
- Patellar opening for positioning and comfort
- Upper and lower circumferential straps
- Universal felt buttress with boot pulls
- Covered multi-position hinge

INDICATIONS:

Recommended for patients who suffer from ACL/PCL sprains and tears, patella pain, medial/lateral instability, and any joint instability associated with athletic activity.

The Padded Multi-Position Hinge Knee Brace offers support and relief for knee injuries, with a secure fit provided by upper and lower circumferential straps, an adjustable universal felt buttress, and a large front opening for comfortable positioning. It's easy to apply with a pull-up design and boot pulls.

Hinged “Sharktrak” Wraparound Brace (K197)

Indications:

Patellar Tendonitis, Post-lateral Retinacular Release,
Patellar Subluxation, Post-op Management
Chondromalacia,

AVAILABLE SIZES

**X-Small/Small, Medium/Large, X-Large/ 2X-Large,
3X-Large/ 4X-Large, Custom**

The K197 knee brace is a low profile hinged wrap around patella stabilizer that features a universal dual dynamic pull buttress with a “sharkskin” texture for customizable pressure on the patella.

LCODE: L1820

“The Spooner”: Patella Stabilizing Strapping System (K199)

Indications:

Controls medial patella Meniscus Ligament (MPML) and
Medial Femoral Ligament (MPFL)
Assures proper alignment while wearing most rigid
functional braces (rigid brace not included)

AVAILABLE SIZES

This product features universal sizing, making it easy for you to find the perfect fit. Contact us if you have any questions about our universal sizing option.

The K199, also known as the “Spooner”, is a product that helps with patella-femoral tracking issues while wearing a rigid knee brace after a knee ligament injury or surgery. It can be used with any brand of rigid brace and can be strapped to the brace or worn directly on the skin to alleviate patella soreness caused by mal-tracking.

LCODE: L2795

Kooflex Patella Stabilizer With Universal Shark Skin Buttress (KC44-NOS)

The Dynamic Patella Stabilizer provides support for individuals with patella-related pain or disorders, as well as medial or lateral collateral ligament instability, ACL/PCL instabilities, or arthritis.

LCode: L1832/1833

Indications:

- Medial/lateral collateral ligament instability
- ACL/PCL instabilities
- Arthritis
- Patella Femoral Disorders

AVAILABLE SIZES

X-Small, Small, Medium, Large, X-Large, 2X-Large, 3X-Large, **4X-Large**, Custom

Kooflex Brace With Stainless Steel Multi-Positional Hinges (KC64-MP)

The KC64-MP Kooflex Brace is a knee brace that features light-duty stainless steel multi-positional hinges on both sides of the knee for medial and lateral support.

LCode: L1832/1833

Indications:

- Arthritis, post-op management, mild to moderate anterior/posterior cruciate instability, medial/lateral instability, and general overall knee support

AVAILABLE SIZES

X-Small, Small, Medium, Large, X-Large, 2X-Large, **3X-Large**, 4X-Large, Custom

Kooflex KneeMate™ Wrap Around With Hinges (KC64-NOS)

The KneeMate™ Wraparound Brace with Hinges provides support and stability to the knee joint. The brace is designed for use during physical or sporting activities and is also suitable for post-op management.

The E10-U "GelBow" Universal Elbow Strap is durable and comfortable to wear during physical activity or activities of daily living. It features a circumferential loop and lock counterforce strap with a tongue for ease of application.

LCode: L3999

NOS Cheerleading Elastic Elbow Sleeve

Indications:

Recommended for tendonitis, muscle strains, and bursitis

AVAILABLE SIZES

X-Small, Small, Medium, Large, X-Large

Introducing the NOS Cheerleading Elastic Elbow Sleeve, the ideal solution for those dealing with tendonitis, muscle strains, and bursitis. This elbow sleeve provides compression and support during sports activities, making it perfect for athletes of all levels.

Hyperextension Hinged Elbow Brace (E15-PC)

The E15-PC Hyperextension Hinged Elbow Brace is designed to control range of motion and help prevent hyperextension. It can be used as a preventative brace or in the management of a hyperextension elbow injury.

LCode: L3710    

Indications:
Designed to control range of motion and help prevent hyperextension. EZE bicep closure and lock with pre-flexion design

AVAILABLE SIZES
X-Small, Small, Medium, Large, X-Large, 2X-Large, 3X-Large, Custom

Cubital Tunnel Support With Velcro Closure (E16)

The Cubital Tunnel Support with Velcro closure is a comfortable and effective solution for managing cubital tunnel syndrome, with a mesh sleeve for secure placement, hook-and-loop adjustable straps over the biceps and forearm, and removable stays for easy washing.

LCode: L3762    

Indications:
Recommended for Cubital Tunnel Syndrome

AVAILABLE SIZES
X-Small, Small/Medium, Large/X-Large, 2X-Large/3X-Large

Koolflex Hyperextension Hinged Elbow Brace (EC15-PC)

The Hyperextension Hinged Elbow Brace (EC15-PC) is designed to control range of motion and help prevent hyperextension of the elbow joint. It can be used as a preventative brace or in the management of a hyperextension elbow injury.

LCode: L3710    

Indications:
Designed to control range of motion and help prevent hyperextension. EZE bicep closure and lock with pre-flexion design.

AVAILABLE SIZES
X-Small, Small, Medium, Large, X-Large, 2X-Large, 3X-Large, Custom

Koolflex Cubital Tunnel Support With Velcro Closure (EC16)

FEATURES:

- Mesh inner sleeve holds the brace in place while adjusting
- Bicep hook and loop with Velcro closure
- Removable stays for washing
- Breathable Koolflex material
- Can be worn overnight (Koolflex version only)

INDICATIONS:

Recommended for treatment of Cubital Tunnel Syndrome

The Cubital Tunnel Support with Velcro Closure offers a comfortable and effective solution for managing cubital tunnel syndrome. The mesh sleeve on the inside of the brace holds it securely in place while allowing for easy adjustments. Hook-and-loop adjustable straps with Velcro closures are located over the biceps and forearm musculature. Thinner material around the elbow crease allows for bending of the elbow. The stays are removable to make for easy washing.

Indications:

Indicated for individuals with knee instability, arthritis, or post-operative care

AVAILABLE SIZES

XXX-Small, XX-Small, X-Small

Custom Braces

We understand that bodies are made differently. If you need a custom size, we'll make it from scratch. Just send us your measurements and in 5-10 days, we'll ship it directly to you. We've been building custom braces for over 20 years and we've seen it all. No worries. We're here to support you.

Please Note: Custom measurements MUST be accurate.

Give circumferential measurements in 2 inch increments for adult products and 1 inch increments for pediatric products for the total length of product. These measurements should be taken directly on the skin, not over clothing.

All made to order custom braces are NON-RETURNABLE.

Shipment is normally within three (5-10) working days. All Custom braces are made from scratch, in the USA, based on measurements submitted by the clinician or the recipient. Pricing starts at \$149 for non-hinged braces. Please call 972-945-9830 if you have any questions.

CUSTOM WRIST MEASURING FORM

To view the online version of the form, click [here](#)

(For the best fit, it is necessary to completely fill out this form)

When measuring a patient for custom wrist braces, it is important to take measurements directly on the skin, not over clothing. Please be aware that custom bracing cannot be refunded or returned because of the personalized nature of the braces. If you have any questions, please call 800-872-5488 or 214-638-6422

HCPCS/L-Codes

The utilization of Healthcare Common Procedure Coding System (HCPCS) codes plays a crucial role in efficiently managing and categorizing our diverse range of devices. These standardized alphanumeric codes allow us to accurately identify and describe each orthopedic brace, simplifying billing, claims processing, and reimbursements with healthcare providers and insurance companies.

PDAC approval stands for “Product Classification and Coding” approval, a process used in the United States to determine the appropriate HCPC code for a medical product or device. PDAC approval is an essential step for manufacturers to ensure their products meet Medicare’s requirements and can be properly reimbursed. It helps ensure that medical products used in the healthcare system are appropriately classified and accessible to patients who need them.

By adhering to HCPCS codes and seeking PDAC approvals, New Options Sports ensures transparency and compliance with industry regulations, ultimately enhancing customer satisfaction and facilitating seamless interactions within the healthcare ecosystem. The use of HCPCS codes empowers New Options Sports to streamline operations, enabling us to focus on what truly matters – delivering high-quality, innovative solutions to our valued customers.

Fitting Guide

In the realm of orthopedic care, we understand that one size does not fit all. Every patient is unique, and their journey to recovery demands personalized solutions. That's why we've dedicated this section of our catalog to help you find the perfect fit for you or your patients' needs. Whether you're recovering from an injury, seeking pain relief, or looking to enhance your mobility, our goal is to provide you with a tailored solution.

Adult Sizing Guides

SIZE	KNEE CIRCUMFERENCE	6" ABOVE KNEE
X-Small	12" - 13"	16" - 19"
Small	13" - 14"	17" - 20"
Medium	14" - 15"	18" - 21"
Large	15" - 16"	19" - 22"
X-Large	16" - 18"	20" - 24"
2X-Large	18" - 20"	22" - 26"
3X-Large	20" - 22"	24" - 28"
4X-Large	22" - 24"	26" - 30"
Custom	24" & UP - PLEASE PROVIDE MEASUREMENTS	

Knee Braces

1. Using a measuring tape, measure and mark 6 inches above your knee and 6 inches below your knee. This will give you the two points where you will measure the circumference of your leg.
2. Wrap the measuring tape around the leg 6 inches above the knee, making sure it is snug but not too tight. Make a note of the measurement.
3. Next, wrap the measuring tape around the leg 6 inches below the knee, again making sure it is snug but not too tight. Take note of the measurement.

SIZE	FOREARM CIRCUMFERENCE
X-Small	8" - 9"
Small	9" - 10"
Medium	10" - 11"
Large	11" - 12"
X-Large	12" - 14"
2X-Large	14" - 16"
3X-Large	16" - 18"
Custom	Made to Measurements

Elbow Braces

1. Using a measuring tape, measure the largest circumference of the forearm, usually about an inch from the elbow. Use this measurement to determine your best size when purchasing an elbow brace.

SIZE	WRIST CIRCUMFERENCE
X-Small	Below - 5"
Small	5" - 6"
Medium	6" - 7"
Large	7" - 8"
X-Large	9" - 10"
2X-Large	10" - 11"
3X-Large	11" - 12"
Custom	12" - Up

Wrist Braces

1. Wrap the measuring tape around the wrist, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing a wrist brace or support.

SIZE	CHEST CIRCUMFERENCE
X-Small	25" - 32"
Small	28" - 35"
Medium	32" - 41"
Large	34" - 44"
X-Large	40" - 48"
2x-Large	42" - 54"
3x-Large	44" - 59"
Custom	50" & UP

Shoulder Braces

1. Wrap the measuring tape around the chest, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing a shoulder support.

SIZE	ANKLE CIRCUMFERENCE
X-Small	5 - 6
Small	6 - 7
Medium	7 - 9
Large	10 - 12
X-Large	12 - 14
2X-Large	14 - 16

Ankle Braces

1. Wrap the measuring tape around the ankle, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing an ankle brace or support.

SIZE	WAIST CIRCUMFERENCE
X-Small	25" - 32"
Small	28" - 35"
Medium	32" - 41"
Large	34" - 44"
X-Large	40" - 48"
2x-Large	42" - 54"
3x-Large	44" - 59"
Custom	50" & UP

Lumbar Braces

1. Wrap the measuring tape around the ankle, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing an ankle brace or support.

Child Sizing Guides

SIZE	ANKLE CIRCUMFERENCE
XXX-Small	6" - 7.5"
XX-Small	6.5" - 8"
Adult X-Small	7" - 8.5"

Ankle Braces

1. Wrap the measuring tape around the ankle, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing an ankle brace or support.

SIZE	CHEST CIRCUMFERENCE
XXX-Small	18" - 25"
XX-Small	21" - 32"
Adult X-Small	24" +

Shoulder Braces

1. Wrap the measuring tape around the chest, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing a shoulder support.

SIZE	WRIST CIRCUMFERENCE
XXX-Small	4.5" - 5.5"
XX-Small	5" - 6"
Adult X-Small	5.5" - 6.5"

Wrist Braces

1. Wrap the measuring tape around the wrist, making sure it is snug but not too tight. Make a note of the measurement. Use this measurement to determine your best size when purchasing a wrist brace or support.

SIZE	KNEE CIRCUMFERENCE
X-Small	9"
Small	10"
Medium	9.5" - 10.5"
Large	11"
X-Large	10.5" - 11.5"
2X-Large	12"
Adult X-Small	13"

Knee Braces

1. Using a measuring tape, measure and mark 6 inches above your knee and 6 inches below your knee. This will give you the two points where you will measure the circumference of your leg.
2. Wrap the measuring tape around the leg 6 inches above the knee, making sure it is snug but not too tight. Make a note of the measurement.
3. Next, wrap the measuring tape around the leg 6 inches below the knee, again making sure it is snug but not too tight. Take note of the measurement.

SIZE	FOREARM CIRCUMFERENCE
Small	6" - 7"
Medium	6.5" - 7.5"
Large	7" - 8"
X-Large	7.5" - 8.5"
2X-Large	8.5" - 9.5"
Adult X-Small	8" - 9"

Elbow Braces

1. Using a measuring tape, measure the largest circumference of the forearm, usually about an inch from the elbow. Use this measurement to determine your best size when purchasing an elbow brace.
